

HeartKinetics is a Digital Health startup providing unique measures of cardiac mechanical function and essentials vital signs to make a full cardiac diagnostic based on AI from remote locations. We are developing the OKCARDIO smartphone application for teleconsultation and the KINO wearable cardiac monitoring device for chronic cardiac patients. Our technology is born from research on cardiac function of astronauts in space. Based in the Walloon region (Gosselies) we are supported by the ESA Space Solutions Belgium & incubated at WSL (Liège); a large part of our activity is performed in the hospitals: Erasme & Brugmann (Brussels), Ambroise Paré (Mons); Maxima Medisch Centrum (Eindhoven). Our vision is cardiac health assessment everywhere anytime and for everyone. We are looking for a:

PROJECT MANAGER

HeartKinetics targets the providers of telemonitoring and teleconsultation services, an activity that has seen an exponential expansion and at the base of the digital revolution in healthcare.

The project manager will be in charge of all the tasks leading to the market access of KINO.Mobile (a.k.a. OKCARDIO <https://okcardio.com>) the smart application and first product of HeartKinetics.

Responsibilities:

- Taking part and leading team coordination meetings organized around the three main pillars of our activities: clinical validations, quality and regulatory matters and further developments
- Leading projects planning, coordinating development team, ensuring projects meet deadlines
- Designing risk mitigation plan
- Ensuring the follow-up of projects and appropriate documentation according to ISO-13485
- Following-up and supporting the clinical research centers and clinical activities
- Establishing the contracts and managing relationships with development partners
- Conducting project reviews and creating detailed reports for executive staff
- Taking part in the development of the marketing and communication material
- Manage post-market survey (PMS)

Profile:

- You have a Master's degree in engineering, computer sciences, or in a field with a corresponding experience significant for the management of development of a medical device
- You have a very good command of English and French
- You have good comprehension of software development requirements and life cycle
- You have +5 years of professional experience in a related field
- You have strong communication skills and easily establish contacts and good relationships
- You are result oriented, ready to deliver in a highly competitive environment
- You are available, flexible and you can move easily in different European countries

Nice-to-haves: you have an experience in medical device development, and the ISO-13485 or IEC-62304, or experience in smart application development in the context of healthcare or wellness; you have experience in sales and marketing or communication; you are fluent in a third language (NL, GE, etc.); you have a personal interest in cardiology or artificial intelligence.

We offer you:

- A permanent position in a fast-growing startup in a booming sector
- A stimulating working environment within a team of enthusiastic entrepreneurs
- Working on a technology that will revolutionize healthcare and will positively impact society
