Announcement

I am very pleased to announce that Ampacimon SA, building on the significant growth it has seen over the last 3 years, has decided to open a fully owned subsidiary in North America.

Headquartered in Atlanta GA, **Ampacimon Inc** will serve our USA and Canadian customers. We see North American as a very promising market, ripe with opportunities. The strong growth of Renewables, decentralized generation and Demand Side Management puts grids under increasing pressure, which calls for the type of grid monitoring solutions Ampacimon offers. Ampacimon's proven technologies, in particular its unique suite of Dynamic Line Rating systems (ADR), offer North American utilities the tools they need to invest into "asset light" solutions to bring the flexibility required on their grid.

Prashanth Duvoor, Vice President Sales and Marketing North America, has joined Ampacimon Inc to lead our expansion in these markets.

Prashanth joins Ampacimon following a very successful career with Siemens where he has taken leadership roles in their T&D business, in particular leading several "Smart grid" intrapreneurship ventures. Prashanth's extensive knowledge of the North American T&D markets will undoubtedly enable Ampacimon Inc to quickly reach its ambitious growth targets.
